Universal MTB

Frame, Fork and Carrier

Frame tested to be 10x stronger than the strongest traditional bikes

TIG-welded frame with oversized steel tubing

Tubular steel carrier rated for 100kg

Tested by leading US frame lab

Highly compatible with common spare parts

Wheels and Tires

Puncture-resistant, long-wear tires

Heavy-duty steel rims

13G high-carbon steel spokes and spoke nipples for high tension wheels

Heavy duty, butyl rubber tubes with Schrader valves

Drivetrain

Rugged single-speed drivetrain

Heavy-duty crankset and high-quality chain

Coaster brake internal hub tested in Germany: Robust, serviceable and more dependable than rod brakes

Optional: Front sidepull-type rim brake or servo-type hub brake

Cockpit, Hardware and Accessories

Pedals with forged axles and improved bearing design

Custom saddle with thick foam, reinforced base, and UV-resistant cover

Extended seatpost and stem for greater adjustability

Steel mudguards and heavy-duty chain guard

Locking, spring-loaded center stand

High-intensity reflectors for increased safety
